

FROM: Victoria Márquez-Mees, MICI Director

REFERENCE: Request MICI-BID-CR-2017-0125 related to the “Reventazón Hydroelectric Power Project”- Request IV (CR-L1049, CR-L1056 and others)

DATE: November 22, 2017

SUBJECT: **Second Extension Request for the Determination of Eligibility**

Dear Requesters,

Notify you that the Executive Board of Directors has approved the request of **51 additional business-days** to the term to determine the eligibility of the Request MICI-BID-CR-2017-0125, related to the “Reventazón Hydroelectric Power Project”, due to the following:

During the registration-eligibility stage of the Request, MICI learned about the communications and meetings held by Management to solve the issues. For this reason, the MICI requested an extension to the deadline for the Determination of eligibility which expired on November 15.

This week, Management informed MICI that it will require more time, approximately two months, for the conclusion of a study and the presentation of alternatives to the Requesters. Therefore, they require an additional extension from MICI. The objective of requesting said extension is to allow the dialogue between Management and the Requesters to continue, so they can find a satisfactory solution to their concerns.

Due to the above, the new deadline for issuing the Eligibility Memorandum for Request MICI-BID-CR-2017-0125 will be **February 1, 2018**.

The Request management to date can be viewed in the [Public Registry](#).

I remain at your service to respond to any queries.
