

Summary of the Request MICI-BID-BR-2018-0132

Due to the confidentiality request presented by the Requesters, a summary of the Request is presented below:

The Request raises a series of harm to the quality of life of families located close to the area of influence of the Program. Specifically, it states that the change in the original route of the highway bypass contemplated in the Program would affect various properties, both homes and businesses, located in a densely populated area.

On the other hand, there are possible environmental and health impacts due to the lack of complementary works to the Program in areas that are currently considered to be polluted and that constitute a source of pests and diseases.

Finally, the Request makes a request for information about the construction works and future activities to be carried out by the Program.
